

## Continuous Backup for Windows Servers, VMware & Hyper-V

Compsys' Backup Solution is the world's fastest and easiest **continuous backup and disaster recovery software** for Windows application servers, VMware ESX(i) and Hyper-V Virtual Servers. The only complete "all-in-one" **backup and recovery solution**, Compsys Backup enables local recoveries from any type of failure in just minutes, with the added assurance of offsite application and **image backup** and **bare metal recovery** from a total site disaster.

### Only Compsys Backup Features Continuous Backup with:

- 8Gb / Minute backup and recovery speeds
- Block level snapshots with incremental forever data capture
- Integrated deduplication reduces backup storage foot print by 80% or more
- Flexible disaster recovery options including bare metal restore and failover virtual machines
- Server rewind feature gives you the ability to roll back to any point-in-time, and recover the entire server or individual files, emails, SharePoint and SQL objects
- Application-aware modules check data consistency to ensure successful recoveries every time
- Cost-effective remote office protection
- Integrated replication to reduce storage costs and enable off-site and cloud-based backups
- Centralized enterprise console to manage a large number of servers and desktops

The world's *most robust* **continuous backup and recovery** solution for Microsoft Windows servers data protection, Compsys also provides deep application integration with today's mission-critical Microsoft applications, including:

Microsoft Exchange / Microsoft SQL / Microsoft SharePoint / Microsoft Hyper-V
