

*Business Continuity is perhaps one of the largest overlooked business precautions today. “What is business continuity?”. This term describes the processes and procedures an organization puts in place to ensure that essential functions can continue during and after a disaster.*

*Nobody likes to think about a tornado ripping through their place of business but we all know it is a very real possibility. Imagine that your server room is wiped out and all data is lost. What Business Continuity plan do you have? We have a solution for you. One that will not break the bank and will let you sleep easy at night. The Compsys Business Continuity Solution affords your business*

*protection against data loss whether it be from a natural disaster, theft or just plain ole server failure. We will provide data redundancy/business continuity and manage the plan for you so you don't have to worry about the IT monster at night.*
